Study Objective:

The purpose of the Salinity Management Study Update is to quantify and set goals for managing the effects of salinity on water resources in Southern California in collaboration with key stakeholders.

Meeting Objectives:

1. Assemble key stakeholders engaged in salinity management issues (MWD member agencies, water and wastewater agencies regulators, trade associations, and more).
2. Provide an overview of the 1999 Salinity Management Study and Action Plan progress.
3. Identify current salinity management issues and strategies based on multiple perspectives.
4. Document input from stakeholders for inclusion in a workshop summary report.
